High performance industrial coatings need to fulfil the most stringent optical requirements. At the same time, the coatings should be cost effective to participate in the global competition.

By teaming up TEGO® Dispers 628 and TEGO® Dispers 671, the productivity will be increased with a higher pigment concentration during the dispersing process. Additionally, you get much better reliability because of the good storage stability of the coating and pigment concentrate.

TEGO® Dispers 628 was designed specifically for solventborne base paints based on titanium dioxide. The key features are low viscosity and high color acceptance.

A very good choice for solventborne pigment concentrates and coatings with organic pigments or carbon black is TEGO® Dispers 671. This product stands for excellent compatibility with different binders and superior coloristic properties.

### **Company information**

Evonik, the creative industrial group from Germany, is one of the world leaders in specialty chemicals. Its activities focus on the key megatrends health, nutrition, resource efficiency and globalization. In 2010 about 80 percent of the Group's chemicals sales came from activities where it ranks among the market leaders. Evonik benefits specifically from its innovative prowess and integrated technology platforms.

Evonik is active in over 100 countries around the world. In fiscal 2010 more than 34,000 employees generated sales of around €13.3 billion and an operating profit (EBITDA) of about €2.4 billion.
