TEGO® Airex 922 is one of the stars of the new generation of deaerators and defoamers from Evonik. Already in use in epoxy resin-based floor coatings conforming to AgBB, it is now also recommended for other applications.

The solvent-free product is also the most effective silicone-free defoamer for various applications of industrial coatings. TEGO® Airex 922 is highly effective both in emission-free and solvent-based high-solids systems based on epoxy, PU and polyaspartics.

The high compatibility of the silicone-free product prevents smear films so that overpaintability is excellent. Besides pigmented systems, TEGO® Airex 922 is also suitable for use in clear coats where the highest demands are made on optical properties.

Company information

Evonik, the creative industrial group from Germany, is one of the world leaders in specialty chemicals. Profitable growth and a sustained increase in the value of the company form the heart of Evonik's corporate strategy. Its activities focus on the key megatrends health, nutrition, resource efficiency and globalization. Evonik benefits specifically from its innovative prowess and integrated technology platforms.

Evonik is active in over 100 countries around the world. In fiscal 2011 more than 33,000 employees generated sales of around €14.5 billion and an operating profit (adjusted EBITDA) of about €2.8 billion.
