TEGO Web Seminars

The interactive web seminar platform from Evonik's business line Coating Additives is now online!

For many years, we've been training customers in the use of our TEGO products, primarily through personal contact. However, it is often the case that the daily routine doesn't allow for physical attendance to our technical trainings and seminars. These new web seminars offer our customers live and flexible information transfer and training on our newest products. On our website, www.tego.de, the customers will find a web seminar area where an initial overview of our online trainings is available. Following successful registration and login, further information on individual training modules will be provided.

Our web seminars are free and protect the identity of all participants while maintaining their ability to utilize a chat feature within the web environment to ask questions and request feedback.

TEGO – Adding Advantages.

Company information
Evonik, the creative industrial group from Germany, is one of the world leaders in specialty chemicals. Profitable growth and a sustained increase in the value of the company form the heart of Evonik’s corporate strategy. Its activities focus on the key megatrends health, nutrition, resource efficiency and globalization. Evonik benefits specifically from its innovative prowess and integrated technology platforms.

Evonik is active in over 100 countries around the world. In fiscal 2011 more than 33,000 employees generated sales of around €14.5 billion and an operating profit (adjusted EBITDA) of about €2.8 billion.
