TEGO® Dispers 687 – Wetting and dispersing additive for matting agents in solventborne coatings

TEGO® Dispers 687 is a new dispersant specially developed for the wetting and dispersing of matting agents in solventborne coatings.

TEGO® Dispers 687 helps achieve coating characteristics such as excellent anti-sedimentation and consistent matte values.

Highly recommended for semi-gloss and matte wood coatings, TEGO® Dispers 687 extends the application window by greatly reducing the sedimentation tendency of matting agents, even when the paint is diluted over a period of time.

TEGO® Dispers 687 is especially suitable for untreated matting agents that have good transparency but high sedimentation tendency. Because of its excellent anti-sedimentation property, it allows users to lessen or eliminate the use of anti-sedimentation additives in their formulation – which is advantageous to the development of highly transparent matte coatings.

Company information
Evonik is one of the world leaders in specialty chemicals. The focus on more specialty businesses, customer-orientated innovative prowess and a trustful and performance-oriented corporate culture form the heart of Evonik’s corporate strategy. They are the lever for profitable growth and a sustained increase in the value of the company. Evonik benefits specifically from its customer proximity and leading market positions. Evonik is active in over 100 countries around the world with more than 36,000 employees. In fiscal 2017, the enterprise generated sales of €14.4 billion and an operating profit (adjusted EBITDA) of €2.36 billion.

About Resource Efficiency
The Resource Efficiency segment is led by Evonik Resource Efficiency GmbH and produces high performance materials and specialty additives for environmentally friendly as well as energy-efficient systems to the automotive, paints & coatings, adhesives, construction, and many other industries. This segment employed about 10,000 employees, and generated sales of around €3.4 billion in 2017.
